PROFILE SUMMARY

Dynamic Full Stack Software Engineer specializing in Next.js and the MERN stack, with a strong focus on building high performance, scalable web applications. Currently spearheading multiple Next.js projects, including logistics platforms and restaurant management systems, leveraging AI driven development environments (Cursor & Gemini) to optimize code quality and speed. Possess a solid foundation in Linux System Administration and currently deepening expertise in Cloud Operations and AWS infrastructure to optimize deployment workflows. Committed to delivering seamless, SEO optimized user experiences using Tailwind CSS, Framer Motion, and modern cloud technologies.

CORE COMPETENCIES & SKILLS

Frontend: Next.js, React.js, Tailwind CSS

Backend: Node.js, Express.js

Cloud & DevOps: AWS (EC2, S3), Cloud Operations, Linux System Administration, Hostinger, Git/GitHub.

AI & Development Tools: Cursor AI, Gemini AI Integration, Figma (UI/UX), Postman, Vercel.

Databases: MongoDB, Supabase, Sanity.io, MySQL

PROFESSIONAL EXPERIENCE

Make It Viral Media & Technologies

Full Stack Software Engineer | 4 Months - Present

- Leading the development of high impact web applications primarily using Next.js.
- Developed a comprehensive Warehouse & Logistics Platform (Southern Design Warehouse), managing frontend, backend, and SEO components.
- Successfully delivered two Restaurant Management Websites, focusing on responsive design and efficient ordering workflows.
- Managing cloud deployments and infrastructure on AWS and Hostinger, ensuring high availability and performance.
- Architecting scalable database solutions using MongoDB for real time data handling.

Make It Viral Media & Technologies

Software Engineering Intern | 6 Months

- Designed and engineered a professional Portfolio Website using Next.js.
- Developed "Lustre Salon" a full stack MERN application featuring an admin dashboard and automated booking system.

- Built a Property Management System using Next.js to streamline real estate operations and data management.

SELECTED PROJECTS

Job Management System with Admin Panel (Freelance Project)

- Designed and developed a comprehensive Job Management System using React.js.
- Engineered a high performance Admin Panel to manage workflows, track job statuses, and handle user data efficiently.
- Technologies: React.js, Tailwind CSS

Southern Design Warehouse

- A logistics and material supply platform built with Next.js and MongoDB.
- Executed a strategic cloud migration for image management, moving from Supabase to Sanity.io to enhance content management flexibility and system performance.
- Technologies: Next.js, MongoDB, Sanity.io, Tailwind CSS.

Brooklyn Pizza Pasta Grill

- A restaurant management and delivery website focused on modern UI/UX, real time content updates, and seamless customer ordering.
- Technologies: Next.js, Tailwind CSS, MongoDB

Mahee Fashion Store

- Full stack E commerce application developed with React.js, Node.js, and MongoDB. Features included user authentication, admin product control, and advanced search.

EDUCATION

BEng. In Software Engineering – IIC University of Technology, Cambodia.
Professional Diploma in Software Engineering (Level 4 & 5) – SEG Awards, UK.

CERTIFICATES

- Cloud Operations & AWS Practitioner Masterclass – IDET (In Progress).
- CS50's Introduction to Programming with Python – Harvard University (via edX).
- CS50's Introduction to Databases with SQL – Harvard University (via edX).
- CS50's Web Programming with Python and JavaScript – Harvard University (In Progress).
